A complete wreck of domestic happiness has often resulted from badly washed dishes, from an unclean kitchen, or from trifles which seemed light as air. But by these things a man often judges of his wife's devotion to her family, and charges her with general neglect when he finds her careless in these particulars. Many a home owes a large part of its thrifty neatness and its consequent happiness to SAPOLIO.

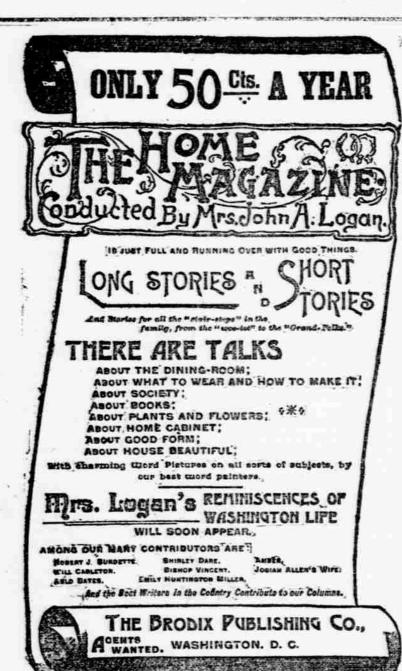

ar Grocers often substitute chemor woods for SAPOLIO, to make a better profit. Send back such articles, and lasist on having just what

Garnered Gleanings.

There were shipped from northern Montana in 1820; 300,000 wethers, valred at \$300,000. Muttons evidently pay. A becaped or six legged calf is owned y a farmer near Mooresville, Ind. When valling all its legs are in use.

Pretty near 20,000,000 boshels of grain con be stored in the twenty-seven great elevators located along the water-ways of Chieners.

Venture county, C.d., will ship 1,000 car loads of tima and white navy beans this season. Bostonians have no kick coming on the bean crop.

A farmer near Whitesboro, Tex., raised a large crop of onions this year and made 300 bushels per acre. He is now

nurlicting them at \$1 per bushel. A Southern California journal claims to have information from the various ration grape growing sections of this ountry that the crop for 1891 will far xood that of any previous year.

An important test of gonn binding machines was made near Joliet, Illinois. It was satisfactorily developed that straw or grass can be used by the machines for binding grain. This solves the chesp twise problem.

C. W. Scott, a farmer near Las Animus, Beat county, Colo., found a covey of quail- on his place, and guards them as he would friends for the benefit they furnish as insect destroyers. He believes them to be the most valuable bird the larmer could propagate.

Prescott, Ariz., Courier: The Salton. sea is still rising, and capitalists have commenced to talk of forming irrigation empanies to golddie lake shore land.... St. Joseph, Mo. Melons from the Pierce farm, Walnut timove, sold, Saturday last, for 50 ets., libets, and \$1 a piece.

When a Spaniard cats a peach or pear y the rondside, wherever he is, he diga a hole in the ground with his feet and covers the seed. Consequently, all over Spain by the readside and elsewhere, fruit in great abundance tempts the laste, and may be picked and enten by body. This fruit is a great boon to thed and thirsty travelers.

We are now producing vix times as such wine as we import. The number I gallons of foreign wines imported but ear was only 5,000,873, whereas the number of galliens of home prodection was over SUCCESS. The importations, noreover, are only 253,000 gallons more than in 1810, when we only produced a 125, we collons of wine.

Pataloes are a drug in the market in dan Francisco. There is practically no sale, and sens of thousands of them are enough cotting on the wharves of the city. One million sucks are already stored on the point. We may water front, and this is being increased July, while the local consumption mak amounts to but 11/60 sucks per day, James EPTS & CO., Comesputate themists, Prore are conduct, putatose there now to feed 10,000 hongry persons every day for

Wonslers of The hor.

The human earlie an organ the true over been able to got at. They can exrine the interior of the eye with eace is throwing into its dock chamber a rev of light reflected from a small mirror, and of late they have found it possible ven to see the gray matter of the brain shich the optic herve enters. The cavty behind the nose they inspect with he aid of a light placed for back in the nouth. They have no difficulty in secag into the stomach by an electric aparatus: the intestines likewise are readienough investigated, and the bladder bo. But the car, as to its internal arrangements, is unapproachable. It is even impossible to dissect it satisfactoriby after death, for the reason that the parts collapse at once when the viral pack leaves the body. The dram in a iving person bins the way to observaion, and, even though it be pierced, the vinding passeges beyond cannot be seen through. On the other side of the drum are the three little bones - the mailet, he anvil and the stirrup-which act upa cach other as levers. The drum acts as a sort of buffer, and the maliet, immediately in centact with it, conveys the sound waves through the unvil and the stirrup to the "cochlea," a spirai shell haped chamber just behind and above he external opening of the ear. This bell is composed of filaments of the nd tory nerve, coiled spirally, and each me erect and waving tremulously in repoase to the slightest wave of sound. they carry the sound impressions directto the brain, and so delicate is their ensitiveness that the hearer perceives not only the degree of londness, but even the finest quality of a sound, the harmony of tenes, and the distance from which it comes. The moment that life became extinct, however, the spirit shell collapses and the marvelous organ is a dead thing, unsatisfactory to the in

vestigating anatomet.

The Wat Railroad. The first timid experiment in railroads was a tramway in Quiney, Macs., built in 1825, chiefly by Thos. H. Perkins and Gridley Bryant, of Bost n. Its only purpose was for the easier conveyance. by horses, of building stone from the granite quarries of Quincy to tide-water It was the germ, ho vever, of a mighty movement in the country. The first rail way in America for pas songer and teaffice the Baltimore and Ohio-was chartered by the Maryland legislature in March. 1827. The capital stock at first was only salf a million dellars, and a portion of it was subscribed by the state and the city of Bultimore. Horses were its motive ower, even after sixty live miles of the oad were built. But in 1829, Peter Cooper, of New York, built a locomotive in Balamore, which weighed one ton and made eighteen miles an hour on a trial trip to Elliott's Mills. In 1839 there; were twenty three miles of railway in the United States, which were increased the next year to minety-five, and in 1935 to 1,000, and in 1810 to nearly three thorsand.—Ecyant's History of the United

The committe appointed by the Aulrain County Farmers and Leborers' Talon to investigate county affairs reorts that it finds, from the mortgage records, notes subject to taxation, June 1 1830, 9815,333, and the amount of notes given in for taxation to be \$05,200 leavor a difference of \$7.00,100, which escaped taxation. They recomment the abolition of the office of county attorney and and the election of a circuit int berney. They also consider that \$1,50% per year is a good and stifficient stalling The first and such a diagram, requires, each

JAMES VICK, SEEDSMAN, Lochester, N. E.

The greatest improvement in Cornets during the past twenty years is the use of Coraline in the place of horn or whalebone. It is used in all of Dr. Warner's Corsets and in no others.

The advantages of Coraline over horn or whalebone are that it does not become set like whalebone, and it is more flexible and more durable.

Dr. Warner's Coraline Corsets are made in twenty-four different styles, fitting every variety of figures-thin, medium, stout, long waists and short waists.

Sold everywhere. WARNER BROS., Mfrs., New York and Chicago.
